TITLE INDEX

A Correlation of Structure to Activity in Organic Photoconductors
J. Stevens and K. A. Zaklika, 75

A New a-Si:H Photoreceptor Drum: Preparation, Electrophotographic Properties and Application
Y. Nakayama, A. Sugimura, M. Nakano, and T. Kawamura, 188

A Novel Micro Metal-Imaging System Based on Selective Zinc Vapor Deposition
S. Ohno and K. Maruyama, 300

A Physical Model for the Daguerreotype
M. S. Barger, R. Messier, and W. B. White, 285

An Investigation of Residual Toner Removal for the IBM 3800 Printer Subsystem
V. M. DePalma, 198

Bimolecular Recombination and Reciprocity in *p*-Type Electrophotographic Films
A. V. Buettner and W. Mey, 80

Charge Carrier Transport in Poly-*N*-vinylcarbazole
M. Fujimo, H. Mikawa, and M. Yokoyama, 84

Charge Transport in Selenium Based Amorphous Xerographic Photoreceptors
S. O. Kasap and C. Juhasz, 239

Concerning the Distribution of Coprecipitated Sulfur Impurities to the Photographic Sensitivity of Silver Halide Emulsions
M. R. V. Sahyun, 163

Deposition of AgBr Crystals on Polymer Film by Reaction of Silver Alginate Film with Hydrobromic Acid
Y. Konishi, 57

Design of a-Si Photoreceptor for Electrophotography
E. Inoue and I. Shimizu, 148

Development of Electrostatic Images with Polarized Toners
I. Chen, 153

Electrochemical and Photoelectric Properties of Silver Specks Formed during Reduction Sensitization on AgBr Emulsion Grains
T. Tani and S. Tanaka, 111

Electrolytic Silver Recovery from Spent Fixing Solutions—An Electroanalytical Study
R. Mina and J. C. Chang, 223

Electron Microscopic Study of the Growth of Sub-Microcrystals in Nascent Silver Iodide and Silver Bromoiodide Hydrosols
H. Saijo, M. Iwasaki, T. Tanaka, and T. Matsubara, 92

Electrophotographic Characteristics of Michlers Ketone–Cadmium Sulfide Binder Layers
A. K. Tripathi, Pradeep, R. G. Mendiratta, and P. K. C. Pillai, 176

Electrostatic Field of Arctangent Voltage Transitions in Electrophotographic Images
E. M. Williams, 88

Extrinsic Carrier Photogeneration Mechanism in Photoconducting Polymers—Exciplex and Charge Transfer (CT) Complex Sensitization
M. Yokoyama and H. Mikawa, 143

Fast Ionic Conduction Concepts Applied to Latent Image Formation in AgBr
H. Ronde, 169

Ferrofluids as a Contrasting Fluid for Electrophoretic Display
J. R. Harbour and M. L. Hair, 30

Formation, Nature, and Action of Sensitivity Centers and Latent Image Specks—Part II. Silver Nucleation, Fog, and the Relation Grain Size/Speed
E. Moisar and F. Granzer, 1

Geometric Flow Model of Development in Electrophotographic Nonimpact Printers
U. Vahtra, 292

High-Speed Platemaking by Coupling a Conventional Presensitized Plate and an Electrophotographic Layer
T. Kitamura and H. Kokado, 158

Image Readout Dynamics in Thin-Film ELIC Device
T. Yoshimura, K. Kiyota, A. Teshima, M. Tanaka, 204

Interparticle Effect on Crystal Growth-AgBr System
R. Jagannathan and J. S. Wey, 61

Ionic and Covalent Configurations in Silver Halide Systems
J. W. Mitchell, 270

Letters to the Editor

Comments on: The formation of the latent image in photographic emulsion grains
Author's reply
J. W. Mitchell, 211
M. R. V. Sahyun, 211

Mechanism of Canon Toner Projection Development
T. Takahashi, N. Hosono, J. Kanbe, and T. Toyono, 254

Modification of Ionic Conductivity in Silver Halide Emulsion Grains by pAg Adjustment as Measured by Dielectric Loss and Photocharge Decay Kinetics
F. P. Chen, K. C. Chang, L. Corben, M. Falxa, and B. Levy, 15

Modified Electron Transfer Mechanism for Spectral Sensitization IX: Observations of Competition between Formation and Destruction of Latent Images in Spectral Sensitization

Molecular-Doped Overcoating Materials for Xerographic Photoreceptors
K. Yamamoto, Y. Okugawa, K. Ohmi, Y. Yamada, and S. Sadamatsu, 179
T. Tani, 213

MTF Noise-Power and DQE of Radiographic Screens
M. G. Fisher, 32

Multilevel-Grain Development: The Effect of Independently Detecting Latent-Image Centers
R. L. Van Metter, 279

Photoconductivity Decay Kinetics of Silver Halide Emulsions at Low Temperature
T. Harada, T. Iijima, and T. Koitabashi, 137

Photogeneration in Triphenylamine-*Lexan* Films with Difluoroboron-1,3-diphenyl-propanedionate
T. E. Goliber and J. H. Perlstein, 236

Photo-Induced Memory Effect of an Organic Photoconductor—III. Charging Characteristics
Y. Nishio and E. Inoue, 24

Preparation and Properties of GD a-Si:H Films for Electrophotography
K. Wakita, Y. Nakayama, and T. Kawamura, 183

Selenium Tellurium Alloys as Photoconductors
L. Cheung, G. M. T. Foley, P. Fournia, and B. E. Springett, 245

Short-Pulse 1064-nm Exposure Fluences of Panchromatic and Infrared Emulsions: Evidence for Production of Photographic Images by Nonlinear Absorption of Light
D. Milam, 171
Some Aspects of the Reciprocity Law in Silver Chloride Emulsions
P. Faelens, 100
Space Charges and Flow in Liquid Electrophotographic Developers
R. Stechemesser, 27
Speed and Fog Increases from the Addition of Surface Reduction Sensitization to a Surface Sulfur-Plus-Gold Sensitized 1-μm AgBr Octahedral Emulsion
S. S. Collier, 98
Study of Photographic Development by Electrochemical Methods I. Rate of Development of a Photographic Film Using a Rotating Ring-Disk Electrode Technique
F. Karasawa, A. Fujishima, and K. Honda, 65
Surface Analysis of Silver Halides by Auger and Electron Energy Loss Spectroscopy
H. Saijo and T. Tanaka, 133
Surface Development Centers on AgBr Created by Atomic Hydrogen
V. Zhelev, 118
Surface Photovoltage Spectroscopy—Application to the Study of Photosensitive Surfaces and Interfaces
H. C. Gatos, J. Lagowski, and R. Banisch, 42
The Color Gamut Obtainable by the Combination of Subtractive Color Dyes. IV. Influence of Some Practical Constraints
N. Ohta, 228
The Design of an Organic Photoreceptor with a Charge-Acceptance Memory II. Poly *N*-vinylcarbazole, Diazonium Salt, and TNF System
J. Hanna and E. Inoue, 69
The Determination of Photographic Gelatin Hardeners by Differential Pulse Polarography
W. H. Simpson, D. B. Schofield, and R. S. Steeves, 107
The Effects of Charge, Size, and Shape on Toner Photoconductor Adhesion in Electrophotographic Systems
C. J. Mastrangelo, 194
The Electrophotographic Properties of a Photoreceptor Using ZnO in PVK
N. C. Khe, I. Shimizu, and E. Inoue, 249
The Mechanism by which Pb^{2+} Ions Influence the Photochemistry of AgCl, Deduced by ESR and Microwave Spectroscopy
R. S. Eachus and J. P. Spoonhower, 20
Theoretical Calculation of Defect Energies for Silver Bromide
P. W. M. Jacobs, J. Corish, and B. A. Devlin, 50
Thermodynamic and Kinetic Aspects of Silver Formation
E. Moisar, 124
Toward a Quantitative Latent-Image Theory
J. F. Hamilton, 263
Visibility of Contour Distortion in Image Recording Systems Using Positive and Negative Processes
J. Helmberger and F. Bestenreiner, 232
